

## Mock Up 3 - Flex

- Mobile First ( mobile, tablet up to around 990px should be very similar and a big css change should only take place from 990px upwards)
- Create HTML and CSS only NO JS/jQuery. Keep mobile menu in collapsed state with hamburger only until 768px.
- Any html images should have width set in css as 100% unless they are background image
- Font on page is either a Google font **Spectral** or **Robot**
- Screen shots provided in this document and in folder show the layout at different screen widths.
